- Most Advanced Self Owned Proprietary Technology
- In House Manufacturing Base in China
- Able to Set Up Manufacturing & Factories in Target Markets
- Can Self Invest Entirely
- Welcome to Joint Venture & Co-investments
- Plan to Capture Multiple Markets Globally
- Plan for Conglomerate Creation and/or Public Listings

01

Building Models

Grounded in integrity, built through generations. We are the bedrocks of construction formwork

The first generation internal mold was slightly tapered, resulting in walls that were thicker at the top and thinner at the bottom

**Gen-2 Mold: Vertical walls, internal mold opening
outwards, external mold sliding**

Gen-3 Molds: All values are adjustable including heights, widths and lengths

Gen-4 Mold: Fully Automatic Mold

02

Split-type Precast Concrete Room Mold

Modular wall and roof panels for easy
transport and installation, featuring
advanced technical engineering

03

Various Boundary Wall & Fencing Molds

Widely used for factories, institutions, and livestock farming. The gold standard for fast construction and low cost
