

JUNO FUTURE

Mining Investment Plans

Unlocking Africa's Mineral Wealth

Gold · Copper · Chromite · Lithium · REEs

Juno Future Holdings Pty Ltd
A Future Trends Group Member Company

Gaborone, Botswana
In collaboration with Office of Presidential Envoy

Who We Are

Juno Future Mining is the natural resources subsidiary of Juno Future Holdings Pty Ltd — a joint venture between Juno Group and Future Trends Group, registered in Botswana.

We identify, acquire, and develop high-value mineral assets across Africa, starting in Botswana and Zimbabwe, with expansion plans into Zambia, Mozambique, DRC, Ghana, and other African countries.

Our model combines Chinese technical expertise, a 30-country government-level network, and strict community-first principles.

Key Facts

- Primary Market:** Botswana & Zimbabwe
- Focus Minerals:** Gold, Copper, Chromite
- Partner Network:** 30+ countries
- Community Equity:** 10% reserved for local communities as grant
- Government Equity:** 20% reserved for the government equity requirement
- Technical Team:** Chinese and global top mining expert and engineers

MISSION & VISION

M

OUR MISSION

To revitalize Botswana's economy and create lasting prosperity by developing Africa's mineral wealth responsibly.

We place community welfare at the heart of every operation; besides government equities — we allocate 10% equity in every project for the local population — while delivering world-class returns for our investors and partners.

We work alongside governments and community, not just alongside markets.

V

OUR VISION

To become Africa's most trusted multi-mineral development company — a bridge between African natural resources and global capital.

We envision Botswana as a model of transparent, community-inclusive mining: where companies use the generated revenues to build hospitals, schools, and infrastructure, and where every local community shares in the upside.

Juno Future will be the standard for responsible mining across the African Continent.

BUSINESS SCOPE

PRIMARY

Gold Exploration & Production

Primary focus.
Targeting near-surface, high-grade orogenic gold systems with 500K–1M oz potential.

PRIMARY

Copper & Base Metals

Kalahari Copper Belt and northeastern belt corridor.
Sediment-hosted Cu-Ag systems with strong global energy transition demand.
Largest long-term budget allocation.

SECONDARY

Residue Mining (EMR)

Enhanced Mining Recovery from historically abandoned sites. High-opportunity countries: South Africa, Zambia, Zimbabwe, Ghana. Lower capital entry, near-term cash flow.

EMERGING

Lithium & Rare Earths

Government confirmed lithium and REE anomalies within our licensed area. Strategic optionality for the battery and clean energy supply chain.

WHY BOTSWANA — OUR GEOGRAPHIC STRATEGY

Why Botswana First

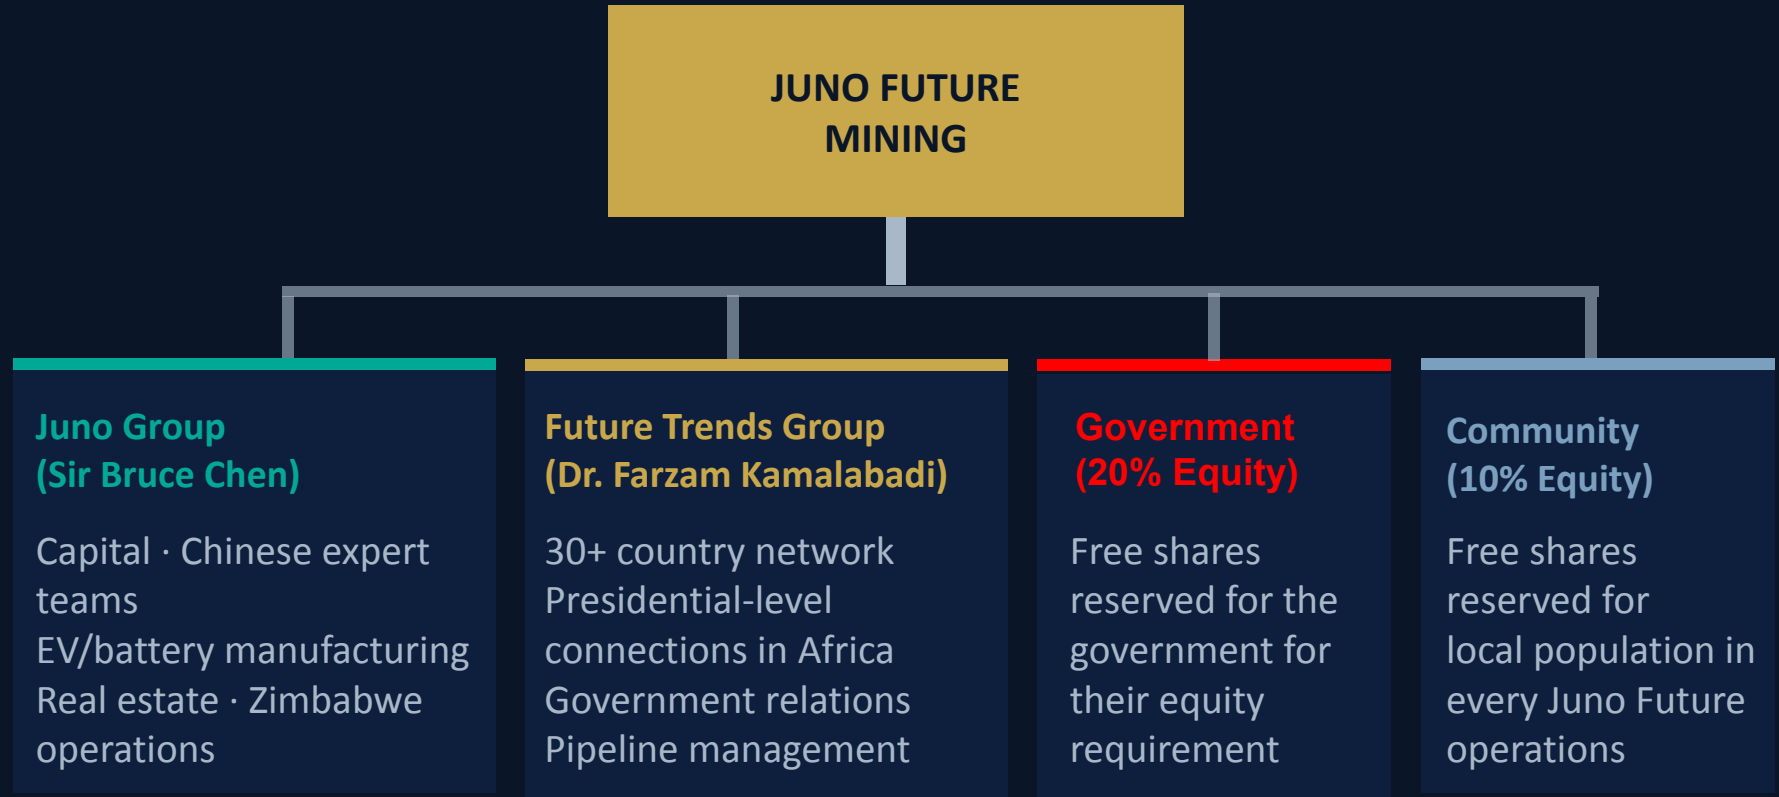

- Transparent, investor-friendly mining regulatory environment
- Government-level relationships and presidential connections
- Proven geological belts: Tati, Vumba, Kalahari Copper Belt
- Infrastructure-ready terrain: roads, rail, power, telecoms
- Stable democracy — Africa's benchmark for governance
- Established office, local team, and BGI data access

Expansion Roadmap

- Botswana**
PRIMARY — Active
- Zimbabwe**
SECONDARY — In progress
- Zambia**
FUTURE — Housing + mining
- Mozambique**
TERTIARY — Pipeline
- Ghana**
FUTURE — Residue mining focus
- DRC**
FUTURE — Contact established
- South Africa**
FUTURE — Major EMR potential

Across Africa

How We Partner

Joint Venture

Equity stake in specific license or mining subsidiary. Preferred for strategic long-term partners with capital and technical capability.

Earn-In Agreement

Fund exploration milestones to earn a defined equity percentage. Structured for capital-deployment partners seeking proven results before full commitment.

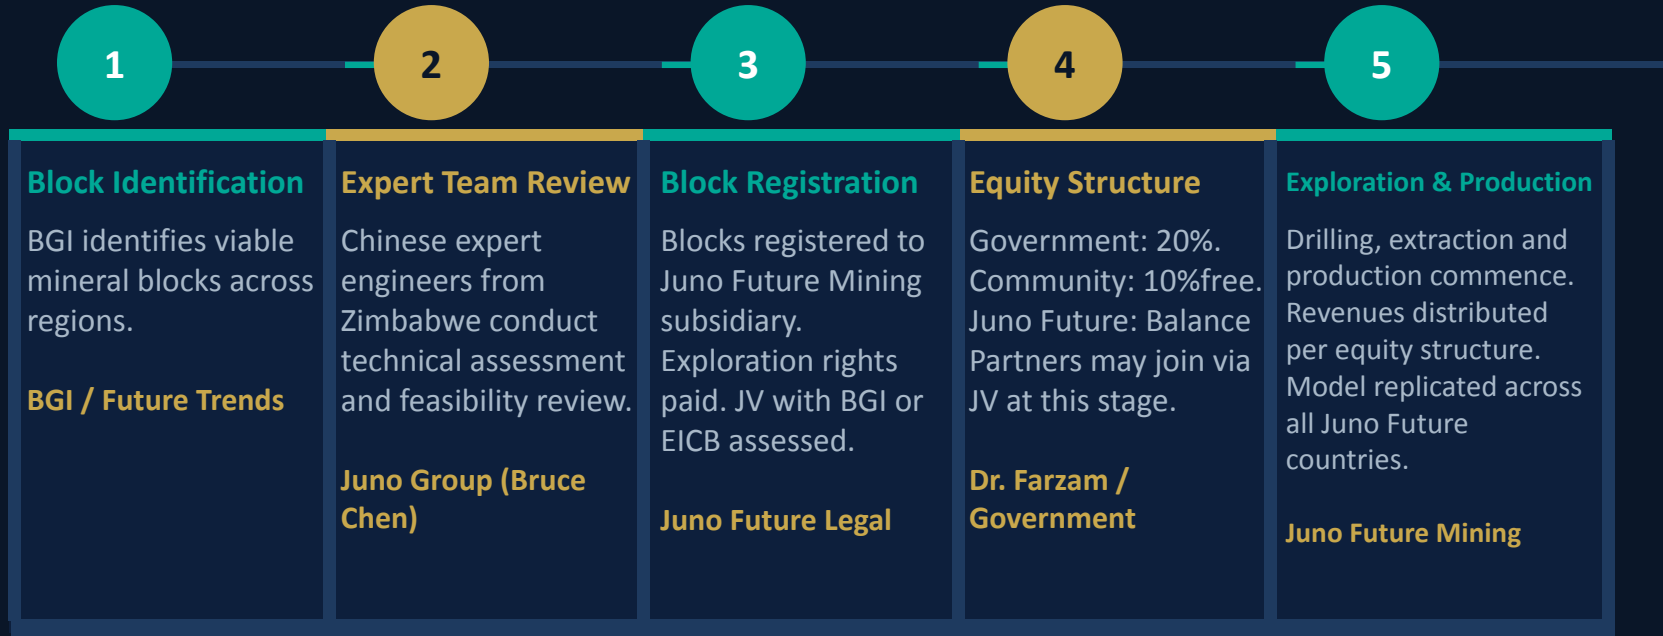

Offtake / Acquisition

Full or partial acquisition of a license or subsidiary. Priority access to mineral offtake for partners with processing or trading infrastructure.

MINING OPERATION WORKFLOW

From block identification to production — our end-to-end process

DURING OPERATIONS

DURING OPERATIONS
